

## Genius Live! Social Team Collaboration

### DELIVERING BEST-IN-CLASS COLLABORATION TOOLS FOR TODAY'S PROJECT WORKFORCE

Genius Live! is Genius Project's social collaboration platform that takes enterprise project and portfolio management to the next level. Genius Live! will empower your users by delivering a collaboration platform that will introduce powerful social media capabilities familiar to today's information worker. Project stakeholders will benefit from Genius Live!'s social interface improving team collaboration, providing a better end user experience, streamlining the flow of project information and increasing productivity among project teams and application adoption.

In response to the changing project workforce, Genius Project delivers a collaboration platform that goes beyond the discipline of tracking budgets, time and specifications. With Genius Project, collaboration lies at the heart of the system providing all of its users with a single project repository, coupled with the best collaboration tools in the industry, leading to a more efficient and responsive project workforce. Genius Project's collaboration platform will empower your workforce by delivering:

- Integrated communication tools facilitated by email alerts and a workflow engine
- Comprehensive Document Management capabilities
- Power social collaboration tools via "Genius Live!"

**SOCIALIZE YOUR PROJECTS.  
STREAMLINE COLLABORATION.  
EMPOWER YOUR PEOPLE.**

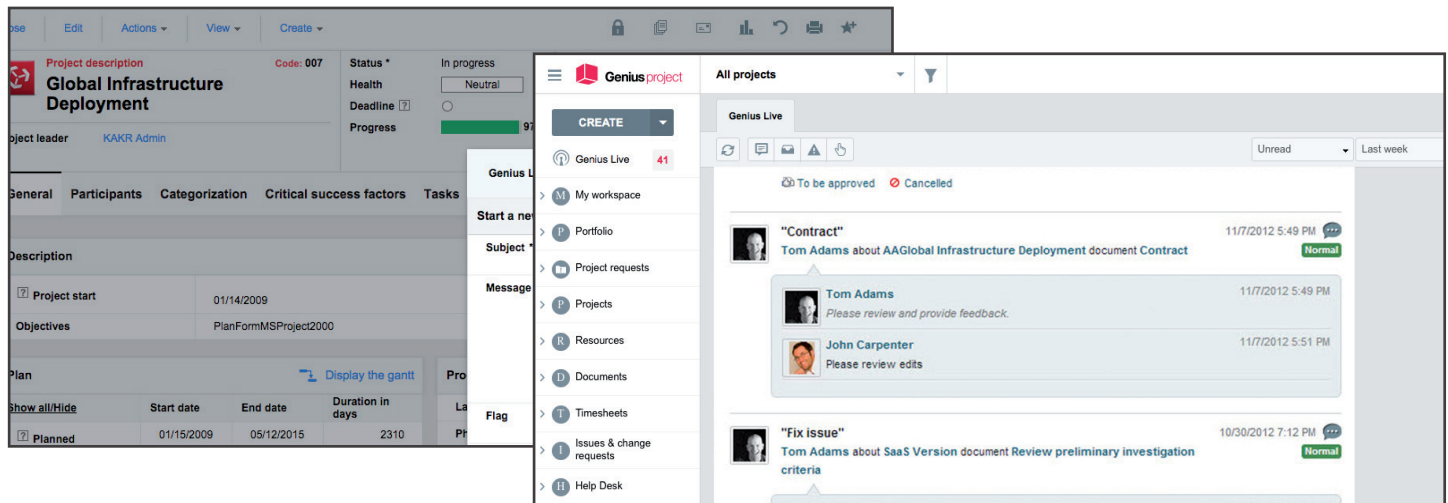

### GENIUS LIVE! HIGHLIGHTS & BENEFITS

- Project forums
- Approval cycle
- E-mail and To-do notification
- Calendar, email and to-do integration
- Configurable role-based workflow engine
- Powerful social collaboration tools via Genius Live!
- Synchronization between planning tool and calendar
- Automatic distribution of new documents and updates
- Increases user adoption and reduces email exchange
- Delivers familiar social media tools accessible on multiple devices
- Single-page view – akin to a social media wall – aggregates project updates and statuses
- Provides project managers and team members' instant access to vital project information

## SOCIAL COLLABORATION OVERVIEW

In a world where information workers communicate with stakeholders via email, intranets, extranets, smart phones and social media and enterprise applications, collaboration tools have become essential in the project team. Project leaders, team members and stakeholders have evolved where expectations have shifted, demanding more relevancy and transparency of information. Genius Live!'s main features include:

- Calendar, email and to-do integration
- Powerful social collaboration tools
- Single-page view – akin to a social media wall – aggregating project updates and statuses
- Instant access to project information for all project members
- Synchronization between planning tool and calendar

## STREAMLINING COMMUNICATION

Providing project managers and team members with the latest social media capabilities, Genius Live! delivers a powerful social interface simplifying the sharing and accessing of information from a single view. Genius Live! organizes information as configurable "stacks" of communication that can be sorted and filtered to highlight items that are due or overdue, need immediate replies, etc. Communication is facilitated with:

- Approval cycle
- Automatic distribution of new documents and updates
- Project forums
- E-mail and To-do notification

## ALERTS AND APPROVALS AT YOUR FINGERTIPS

Genius Live! is designed to make your life easier by pushing relevant information, alerts, notifications and project statuses all to your personal "Wall" for review. Genius Project users can now easily exchange messages, review alerts and respond to workflow approvals from a single interface. Furthermore, Genius Live! provides a notification indicator that alerts users of the latest unread updates so that mission-critical information does not slip through the cracks.

## ACCESS GENIUS LIVE! IN EVERY RECORD

Project managers, team members and stakeholders can access Genius Live! in every record of information in Genius Project. Whether you are viewing information at the project level or at the task level, the Genius Live! tab is accessible within that record of information for collaboration and viewing latest updates.
